

**Nordic Association for
Computational Mechanics**

NINTH NORDIC SEMINAR ON COMPUTATIONAL MECHANICS

**Technical University of Denmark
October 25-26, 1996**

Contents

Keynote lectures:

On Engineering Design Optimization	1
<i>N. Olhoff</i>	
Parametric Dependence in Structural Response	7
<i>A. Eriksson & C. Pacoste</i>	
Computer Aided Tailoring of Composites	11
<i>A. Pramila</i>	
Industrial Applications of Computational Mechanics for Marine Structures	21
<i>P. Bjerager</i>	

Short presentations:

Session 1a

Product Model for Structural Analysis of Skeleton	25
<i>M. Heinisuo</i>	
Optimization of Fiber-Reinforced Plastic Circular Plates	29
<i>J. Lellep & A. Mürk</i>	
CAD Integrated Shape Design Optimization	33
<i>A.S. Kristensen</i>	
Adaptive Finite Element Analysis for Problems with Complicated Geometry	37
<i>X.D. Li & N.-E. Wiberg</i>	

Session 1b

Finite Element Analysis of the Erichsen Cupping Test with Special Reference to Necking	41
<i>R. Moshfegh & L. Nilsson</i>	
Residual Stresses and Spring Back of Blade Forging Using Solid and Flow Approaches	47
<i>B. Soltani, K. Mattiasson & A. Samuelsson</i>	
On Anisotropic Yield Criteria for Aluminium Alloys	51
<i>H. Ilstad, O.-G. Lademo, O.S. Hopperstad, M. Langseth & K.A. Malo</i>	

Viscoplasticity with Dynamic Yield Surface Coupled to Damage - Formulation and Integration	55
<i>M. Johansson & K. Runesson</i>	
Session 2a	
Acoustic Analysis Applied to Aircrafts	57
<i>G. Sandberg & M. Gustavsson</i>	
Topological Fluid Mechanics of Axisymmetric Flows	61
<i>M. Brøns</i>	
Tracking Non-Spherical Particles in Combustion Systems	65
<i>L. Rosendahl & T.J. Condra</i>	
Session 2b	
Nonlocal Plasticity and Continuum Damage at Shear Band Formation in Soil Slope	69
<i>L. Strömberg</i>	
Localization in Drained and Undrained Frictional Material	73
<i>J. Larsson & R. Larsson</i>	
Application Areas for the Inner Softening Band Method	77
<i>R. Tano & M. Klisinski</i>	
Session 3a	
Convex Approximation Methods for Large Scale Structural Problems .	81
<i>P. Duysinx</i>	
Reliability Analysis of a Midship Section	85
<i>P. Friis Hansen</i>	
Design Optimization of Structures Made of Brittle Materials Using Weibull Statistics	91
<i>E. Lund</i>	
Session 3b	
Gradient-Regularized Plasticity Coupled to Damage - Formulation and Numerical Algorithm	95
<i>T. Svedberg & K. Runesson</i>	
Concrete Modelling by Damage Mechanics	99
<i>M. Polanco-Loria</i>	

Tensile Strength of Concrete at Early Age	103
<i>A.B. Hauggaard & L. Damkilde</i>	
Session 4a	
Optimization of the Directivity of a Loudspeaker Diaphragm	107
<i>S.T. Christensen & N. Olhoff</i>	
Optimal Topology Design for Contact Problems	111
<i>J. Petersson</i>	
Some General Optimal Design Results using Anisotropic, Non-linear Materials	115
<i>P. Pedersen</i>	
Session 4b	
Nonlinear Continuum Mechanics with Polarity	117
<i>E. Byskov & J. Christoffersen</i>	
A Note on the Consistent Linearization in Plasticity for Yield Criteria of the Mohr-Coulomb Type	121
<i>R. Larsson & K. Runesson</i>	
Modelling of Early Age Concrete	125
<i>A.B. Hauggaard & L. Damkilde</i>	
Session 4c	
Prediction of Bending Response of Wood Experiencing Compressive Strain Localization	129
<i>J.S. Poulsen</i>	
Numerical Simulation of Initial Defibration of Wood	133
<i>S. Holmberg & H. Petersson</i>	
Extended Two-Dimensional Element Formulation for Beam Analysis	137
<i>O. Dahlblom, S. Ormarsson & H. Petersson</i>	
Session 5a	
Plastic Calculation Models of Continuous Purlins	141
<i>M. Laine</i>	
Different Interpolation Technique for Curved Elements	145
<i>H. Perttola & J. Paavola</i>	

Tracing Local Buckling Phenomena (Wrinkles) in Sheet Metal Forming <i>B. Häggblad & P. Nordlund</i>	149
Session 5b	
Explicit Dynamic Formulation of Large Strain Shell Analysis for the Morley Triangular Element <i>U. Wendt</i>	153
Computational Buckling Analysis of Wind Turbine Blades <i>A. Rickstiņš</i>	157
Computational Investigation of Repetitive Vertical Human Loading . . . <i>J. Jönsson</i>	161
Session 5c	
A Preliminary Study of Error Estimation in Ultimate Load Analysis of Structural Components <i>I. Tiller, K.M. Mathisen, O.S. Hopperstad & K.M. Okstad</i>	165
Analysis of Contact-Impact Problems using Parallel Computers <i>P. Persson & L. Nilsson</i>	169
Dynamic Response of Multibody Systems with Joint Clearance <i>P. Ravn</i>	173
Session 6a	
Single Hardening Plasticity Model for Frictional Materials <i>P.V. Lade</i>	177
Calibration of ABAQUS Cap Model to Copenhagen Limestone <i>O. Hededal</i>	181
A Characteristic State Model for Friction Materials <i>S. Krenk</i>	185
Modelling of Granular Flow in a Silo <i>J.F. Olsen & L.O. Nielsen</i>	189
Session 6b	
Error Estimation of Reissner-Mindlin Elements using Statically Admissible Stress Resultants <i>K.M. Okstad, T. Kvamsdal & K.M. Mathisen</i>	193

Adaptive Finite Element Method with Recovery based Estimator for Parabolic Problems	197
<i>S. Ziukas & N.-E. Wiberg</i>	
Distortion Measures for General Quadrilateral Plane Finite Elements with Straight and Curved Boundaries	201
<i>N. Lautersztajn-S. & A. Samuelsson</i>	
Reduction of Under-Determined Linear Systems by a Sparse Block Matrix Technique	205
<i>N.J. Tarp-Johansen, P.N. Poulsen & L. Damkilde</i>	
Session 7a	
Semi-Analytical Finite Elements for the Thin-Walled Structures	211
<i>R. Kačianauskas</i>	
Collapse Analysis of Offshore Jackets with Co-Rotating Nonlinear Beam Elements	215
<i>S. Krenk, C. Vissing-Jørgensen, S. Fredsgaard & J. Wægter</i>	
Mode Interaction in Thin-Walled Structures	219
<i>P.N. Poulsen & L. Damkilde</i>	
Session 7b	
Integration in Numerical Phase Change Analysis	223
<i>A.B. Hauggaard, L. Damkilde & S. Krenk</i>	
Finite Element Modelling of Freezing of Fine Grained Iron Ore	227
<i>A. Tørlien & G. Horrigmoe</i>	
Convection-Diffusion Problems with Significant First-Order Reversible Reactions	231
<i>B. Johannesson</i>	
Session 7c	
On the Core Congruential Total Lagrange Formulation for Finite Deformation Analysis of Bar Structures	237
<i>M. Ander & A. Samuelsson</i>	
Flexible Multibody Systems with Constant Mass Matrix	241
<i>N.L. Pedersen</i>	

Improved Eigenfrequencies and Eigenmodes in Dynamics 245
P. Hager, R. Bausys & N.-E. Wiberg
